

RAVIKANTH DULAM

Senior DevOps & MLOps Engineer

+91 7386607918 | ravigfx420@gmail.com | linkedin.com/in/ravikanth-dulam-a74066263 | Hyderabad, India

PROFESSIONAL SUMMARY

Results-driven DevOps & MLOps Engineer with 4+ years of experience designing scalable cloud infrastructure, automating ML pipelines, and accelerating software delivery. Proven expertise in Kubernetes, Terraform, Azure DevOps, AWS, Docker, and CI/CD automation. Track record of reducing deployment time by 50%, maintaining 99.9% uptime, and delivering production-ready MLOps platforms. Skilled in bridging data science and engineering teams to drive reliable, secure, and cost-optimized cloud-native solutions.

TECHNICAL SKILLS

Languages	Python, Bash / Shell Scripting
MLOps	ML CI/CD Automation, Model Versioning, Flask + Gunicorn Inference APIs, REST-based Model Serving, Artifact Storage (S3 / HTTP), Reproducible ML Deployments
Cloud	AWS (EC2, S3, VPC, IAM, ALB, ASG) Azure (VMs, Storage, Key Vault, ADO, Monitoring)
Containers & Orch.	Docker, Kubernetes (Deployments, Services, Ingress, RBAC), Horizontal Pod Autoscaling
IaC & CI/CD	Terraform, Azure DevOps, Azure Pipelines, GitHub Actions, Jenkins
Monitoring	Prometheus, Grafana, Azure Monitor
Security	SonarQube, OWASP, Vulnerability Scanning, Azure Key Vault, IAM RBAC
Version Control	Git, GitHub — branching, merging, PRs, access management

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer | Multiscale Technologies Inc — Hyderabad

2021 – Present

- Automated CI/CD pipelines for 10+ applications using Azure DevOps, Azure Pipelines, GitHub Actions, and Jenkins — reducing deployment cycle time by 50%.
- Provisioned and managed AWS EC2, VPC, S3, and Azure Virtual Machines using Terraform (IaC), cutting infrastructure setup time by 50%.
- Developed and maintained Python-based automation scripts for infrastructure provisioning, environment management, and deployment workflows.
- Built and deployed Docker containerized applications across Dev, QA, UAT, and Production environments for consistent and scalable releases.
- Orchestrated containerized workloads on Kubernetes, supporting high-availability multi-environment deployments.
- Implemented monitoring and alerting using Prometheus and Grafana for proactive incident detection and infrastructure observability.
- Integrated SonarQube, OWASP, and vulnerability scanning into CI/CD pipelines, improving code quality and security posture.
- Collaborated with development, QA, and data science teams to streamline application and ML model release workflows.
- Performed Git operations including branching, merging, pull requests, and multi-repository access management.

KEY PROJECTS

MLOps Platform Engineer | Internal Project — AWS, Azure & Kubernetes 2022 – Present

- Designed and built a production-ready MLOps platform on AWS and Kubernetes supporting scalable model training, versioning, deployment, and real-time inference.
- Developed ML inference APIs using Python (Flask + Gunicorn), enabling REST-based real-time prediction services consumed by downstream applications.
- Containerized all ML workloads using Docker and deployed on Kubernetes (Deployments, Services, Ingress) ensuring high availability and horizontal scalability.
- Implemented IAM RBAC for Data Scientists, ML Engineers, and MLOps Engineers — aligning with enterprise security and compliance standards.
- Built high-availability auto-scaling inference services using AWS ALB and Auto Scaling Groups (ASG), optimized for low-latency, high-throughput serving.
- Integrated Amazon S3 and HTTP-based artifact storage for model versioning, fully decoupling model delivery from runtime infrastructure.
- Automated ML service provisioning using EC2 user-data scripts and CI-driven workflows, ensuring reproducible and immutable model deployments.

DevOps / Cloud Engineer | Novelis 2022 – 2023

- Managed Azure and AWS infrastructure; automated deployments reducing environment setup time by 50% while ensuring high availability and security compliance.
- Automated provisioning and lifecycle management of VMs using Azure Portal and Terraform, cutting manual effort by 50%.
- Designed and implemented CI/CD build and deployment pipelines, accelerating release cycles by 40% and reducing deployment errors.
- Diagnosed and resolved Azure Storage and VM performance issues, increasing system uptime by 25% and reducing incident resolution time by 30%.
- Secured sensitive credentials using Azure Key Vault, minimizing exposure risks and ensuring policy compliance.
- Implemented Prometheus and Grafana monitoring for infrastructure observability and proactive alerting.

DevOps Engineer | Micron 2021 – 2022

- Deployed containerized applications using Docker and Kubernetes, achieving 99.9% uptime across all production environments.
- Automated CI/CD workflows using Azure DevOps and GitHub Actions, reducing release cycle time by 50% and improving deployment reliability.
- Integrated SonarQube security scanning and Azure Key Vault, reducing application vulnerabilities by 30% and improving credential security.
- Managed and automated infrastructure for ELT data projects, improving data pipeline reliability and operational efficiency.
- Implemented Azure monitoring and observability solutions, maintaining 99.9% SLA through proactive scaling, load balancing, and performance tuning.

KEY ACHIEVEMENTS

- **CI/CD at Scale:** Automated CI/CD pipelines for 10+ applications across 3 major clients — consistently delivering 40–50% reduction in deployment cycle time.
- **MLOps Platform:** Architected and delivered an end-to-end production MLOps platform covering model training, versioning, containerized deployment, and real-time REST inference.
- **Security Integration:** Embedded SonarQube, OWASP, and vulnerability scanning into CI/CD pipelines, reducing vulnerabilities by 30% and achieving zero critical findings in production.
- **99.9% Uptime:** Maintained 99.9% SLA across production Kubernetes environments through proactive monitoring, auto-scaling, and optimized load balancing.
- **Infrastructure Cost Optimization:** Optimized cloud compute and storage resource allocation, reducing infrastructure overhead while improving deployment consistency.

EDUCATION & CERTIFICATIONS

B. Com in Computer Science — Acharya Nagarjuna University

2016 – 2019

Pursuing: AWS Solutions Architect Associate | Microsoft Azure DevOps Expert (AZ-400) | Certified Kubernetes Administrator (CKA)
