

RAVIKANTH DULAM

Senior DevOps & MLOps Engineer

+91 7386607918 | ravigfx420@gmail.com | linkedin.com/in/ravikanth-dulam-a74066263

PROFESSIONAL SUMMARY

Results-driven DevOps & MLOps Engineer with 7+ years of progressive experience across cloud infrastructure, automation, and machine learning operations. Deep expertise in Kubernetes, Terraform, Azure DevOps, AWS, Docker, and end-to-end CI/CD pipeline automation. Demonstrated track record of deploying scalable cloud infrastructure, reducing deployment time by 50%, maintaining 99.9% uptime, and building production-grade MLOps platforms. Experienced across major enterprise clients and environments including Publicis Sapient, Multiscale Technologies, ExpoCon Technologies, Cyient Ltd, and Cloud Mellow Technologies. Adept at bridging development, operations, and data science teams to deliver secure, automated, and cost-efficient solutions at enterprise scale.

TECHNICAL SKILLS

Version Control	Git, GitHub, Bitbucket
CI/CD & DevOps	Azure DevOps, Azure Pipelines, Jenkins, GitHub Actions, CI/CD for Machine Learning
Cloud	AWS (EC2, S3, VPC, IAM, ALB, ASG, ECS, Fargate, CDK, CloudWatch, Route 53), Azure (VMs, Storage, Key Vault, ADO, AKS, ARM)
Containers & Orchestration	Docker, Kubernetes (Deployments, Services, Ingress, RBAC), Helm, AWS ECS
Infrastructure as Code	Terraform, Azure ARM Templates, AWS CDK (Python)
Monitoring & Observability	Prometheus, Grafana, Azure Monitor, AWS CloudWatch
Security & Quality	SonarQube, OWASP, Vulnerability Scanning, IAM, Azure Key Vault
MLOps & Data	MLOps Pipelines, ML Model CI/CD Automation, Flask, Gunicorn, Amazon S3
Scripting	Bash, Python
Operating Systems	Linux (Ubuntu, RHEL), Windows Server

PROFESSIONAL EXPERIENCE

Senior DevOps & MLOps Engineer | [Multiscale Technologies Inc](#) | June 2022 – Present

- Led cloud and virtualization management services across AWS and Azure for enterprise clients, ensuring high availability and performance.
- Architected and delivered end-to-end DevOps solutions automating infrastructure provisioning, deployment pipelines, and environment management.
- Designed, maintained, and optimized CI/CD pipelines using Azure DevOps, Azure Pipelines, GitHub Actions, and Jenkins across 10+ applications.
- Automated CI/CD pipelines, reducing deployment time by 50% and minimizing release failures.
- Spearheaded MLOps pipeline development, enabling automated model training, versioning, and deployment for data science teams.
- Provisioned AWS EC2, VPC, S3 and Azure Virtual Machines using Terraform, cutting infrastructure setup time by 50%.
- Implemented security best practices including SonarQube, OWASP scanning, and Azure Key Vault integration across all pipelines.

- Managed multi-environment deployments (Dev, QA, UAT, Prod) ensuring smooth, consistent release workflows.
- Mentored junior engineers on DevOps best practices, CI/CD design patterns, and cloud infrastructure management.
- Used CloudWatch for centralized logging, ECS service metrics, and alarms for proactive infrastructure support.
- Implemented AWS CDK using Python for provisioning ECS clusters, VPC networking, IAM roles, security groups, and ALB configuration, enabling reusable and version-controlled infrastructure deployment.

Jr. DevOps Engineer | Expocon Technologies | July 2021 – June 2022

- Migrated legacy monolith applications to microservices deployed on AWS ECS with Fargate, improving scalability and cost-efficiency.
- Set up CI/CD pipelines using GitHub Actions for seamless ECS deployments.
- Configured ALB target groups and service discovery for ECS-backed services using Route 53.
- Used CloudWatch for centralized logging, ECS service metrics, and alarms for proactive infrastructure support.
- Implemented AWS CDK using Python for provisioning ECS clusters, VPC networking, IAM roles, security groups, and ALB configuration, enabling reusable and version-controlled infrastructure deployment.

DevOps & MLOps Engineer | Cyient — Hyderabad | June 2020 – June 2021

- Managed and configured Linux-based servers on AWS and Azure for development and staging environments.
- Supported setup and maintenance of CI/CD pipelines using Jenkins and Azure DevOps, improving build automation across teams.
- Worked on Docker containerization of applications, enabling consistent deployment across environments.
- Performed Git operations including branching strategies, merging, and pull request reviews to maintain code quality.
- Assisted in writing Terraform scripts for automated provisioning of AWS EC2 instances, S3 buckets, and VPCs.
- Monitored infrastructure health using Prometheus and Grafana, raising alerts and resolving incidents proactively.
- Coordinated with development teams to troubleshoot build failures and streamline integration testing workflows.
- Participated in on-call rotations, supporting production deployments and resolving critical infrastructure incidents.

DevOps Intern | cloud Mellow Technologies | December 2019 – May 2020

- Supported AKS test cluster maintenance and Helm chart updates, gaining hands-on experience with Kubernetes orchestration.
- Containerized Node.js applications using Docker and assisted in CI/CD pipeline creation.
- Wrote Bash scripts for automation of common DevOps tasks and assisted with pipeline issue triaging.
- Maintained project documentation, SOPs, and infrastructure runbooks to support team operations.

DevOps Intern | Pearl Thoughts | June 2019 – November 2019

- Supported AKS test cluster maintenance and Helm chart updates.
- Containerized Node.js applications using Docker and assisted in pipeline creation.
- Wrote Bash scripts for automation of common DevOps tasks and assisted with pipeline issue triaging.
- Maintained project documentation and SOPs.

KEY ACHIEVEMENTS

CI/CD Excellence	Designed and implemented CI/CD pipelines for 10+ applications, reducing deployment time by 50% and improving release reliability.
MLOps Automation	Built production-grade CI/CD pipelines for ML models, enabling faster training, versioning, and inference deployment.
99.9% Uptime	Maintained 99.9% SLA across production Kubernetes workloads through proactive monitoring and auto-scaling.
Security Integration	Embedded SonarQube, OWASP, and vulnerability scanning into pipelines, reducing application vulnerabilities by 30%.
Cost Optimization	Optimized cloud resource allocation and infrastructure provisioning, delivering measurable reductions in operational costs.
Cloud Migration	Successfully migrated legacy monolith apps to AWS ECS/Fargate microservices architecture, improving scalability and efficiency.
IaC Leadership	Automated VM provisioning using Terraform and AWS CDK, cutting manual infrastructure setup effort by 50%.

KEY PROJECTS

DevOps / Cloud Engineer | Novelis |

- Managed Azure and AWS infrastructure, automating deployments and reducing environment setup time by **50%**.
- Configured and maintained Linux and Red Hat VMs in Azure, ensuring system stability and security compliance.
- Automated provisioning using Azure Portal and **Terraform**, cutting manual effort by 50%.
- Secured sensitive credentials using **Azure Key Vault**, minimizing exposure risks and ensuring compliance.
- Designed and implemented CI/CD build and deployment pipelines, accelerating release cycles by 40%.
- Implemented monitoring and alerting with **Prometheus** and **Grafana**, improving observability and proactive incident response.

DevOps Engineer | Micron |

- Deployed containerized applications using **Docker** and **Kubernetes**, achieving **99.9%** uptime across production environments.
- Automated CI/CD workflows using **Azure DevOps**, Azure Pipelines, and **GitHub Actions**, reducing release cycle time by 50%.
- Integrated SonarQube security scanning and Azure Key Vault, reducing vulnerabilities by 30%.
- Built and automated CI/CD pipelines for 10+ applications, minimizing manual errors and accelerating software delivery.

Internal MLOps Platform | Azure, AWS & Kubernetes |

- Designed and built a production-ready **MLOps platform** on AWS and Kubernetes supporting scalable model training, deployment, and lifecycle management.
- Developed and deployed ML inference APIs using **Flask** and **Gunicorn**, enabling REST-based real-time prediction services.
- Containerized ML workloads using **Docker** and deployed on **Kubernetes** for high availability.
- Built auto-scaling inference services using **AWS ALB** and **Auto Scaling Groups** (ASG) for high throughput and low-latency serving.
- Integrated Amazon S3 and HTTP-based artifact storage for model versioning, decoupling delivery from runtime infrastructure.

EDUCATION

B. Com in Computer Science — Acharya Nagarjuna University | 2016 – 2019
